

Cross-Test Report

Member 5's Upload APIs (US-70, US-71), Unit Level

Project Upcomer, Sprint 1
Tester Member 1
Code tested main at 0e1f7d2 (after PR #17); report built from commit 2b53193
Test run 2026-10-05 18:07 UTC, Vitest 3.2.7 on Node 24.15.0
Test file tests/unit/cross-test-member-5-uploads.test.ts

Verdict

73 of 73 tests pass, covering 75 recorded API calls. US-70 and US-71 meet every key check in the Sprint 1 plan: valid uploads, invalid or corrupt files, storage success and failure, and the file can be opened after upload. One item contradicts the written plan and is carried over from the first cross-test (Finding 1). The other findings are low-risk observations.

Test group	Tests	Calls	Passed
A. POST /api/admin/uploads — access control	6	6	6/6
B. POST /api/admin/uploads — request handling	4	4	4/4
C. POST /api/admin/uploads — form fields	28	28	28/28
D. POST /api/admin/uploads — file checks	16	16	16/16
E. POST /api/admin/uploads — storage and record failures	6	7	6/6
F. Upload then GET /files/:fileId — file retrievable after upload	7	14	7/7
G. getUploadOptions — course list for the upload form	2	0	2/2
H. validateUploadFile and parseUploadForm — direct calls	4	0	4/4
Total	73	75	73/73

Check	Result
Cross-test file	73/73 pass
Whole unit suite with the new file	480/480 pass, 28 files
npm run lint	Pass
npx tsc --noEmit	Pass (after npx prisma generate refreshed a stale local client)
npm run build, npm run test:e2e	Not run: test-only change, no app code touched

Method

The tests call the real route handlers. Only three things are faked:

- **The database** (@/lib/db), with an in-memory store: courses **course-a** (EECE 350, professor **prof-a**) and **course-b** (EECE 351, professor **prof-b**), and the term **term-fall**.
- **The session cookie** (next/headers), which selects the caller: no session, **admin-token**, **student-token**, **expired-admin-token** or **forged-token**.
- **unlink**, in test E-03 only, to force a cleanup failure.

Everything else is real code:

- POST /api/admin/uploads

- `lib/uploads.ts` and `lib/upload-rules.ts`
- Member 4's `lib/file-metadata.ts`
- Member 1's `getAdminUser` and session check
- the logger
- files written to a temporary storage folder
- Member 3's `GET /files/:fileId`, which section F uses to open each uploaded file again

Findings

1. An unknown professor returns 400, but the plan says 404 (carried over, still open)

Covered by tests C-18 and C-19. The plan says “an unknown course or professor returns 404”. An unknown course returns **404** (C-20). An unknown professor, or a professor who does not teach the course, returns **400 professor_not_assigned**. The check now lives in Member 4's shared `lib/file-metadata.ts`, so Members 4 and 5 should decide together. Either change the plan's wording or map `professor_not_assigned` to 404 in `STATUS` in `lib/uploads.ts`. The tests assert the current 400, so CI stays green until that decision is made.

2. Observation: any ZIP renamed to .docx or .pptx is accepted

Covered by test D-16. Only the 4-byte ZIP signature is checked. The risk is low: only admins can upload, and non-PDF files are served as `attachment` with `nosniff`. A stricter check would look for `[Content_Types].xml` inside the archive.

3. Observation: without a Content-Length header, the whole body is read before the 20 MB check

Covered by test D-10. The early 413 depends on the header. Browsers always send it, and a request without it still gets a correct 413, but only after the full body has been parsed in memory.

4. Note: a failed cleanup leaves one orphan file (by design, and logged)

Covered by test E-03. If both the database record and the file deletion fail, the file stays in storage. Both `upload_cleanup_failed` and `upload_record_failed` are logged.

First report's defects, re-checked

First report	Status on 0e1f7d2
e2e <code>getByRole("alert")</code> matched Next's route announcer	Fixed in 2265875: the locator is scoped to the upload form (checked in the code; e2e not run here)
Unknown professor returns 400, not 404	Still open : see Finding 1
The upload API was open to anyone	Fixed in 83f8b16: tests A-01 to A-06 confirm 403

Results per test

Each test lists the numbers of the calls it made. These numbers link to the call table.

A. POST `/api/admin/uploads` — access control

ID	Test	Result	Time	Calls
A-01	logged-out visitor gets 403 and nothing is stored	PASS	14 ms	1

ID	Test	Result	Time	Calls
A-02	logged-in student gets 403 and nothing is stored	PASS	3 ms	2
A-03	admin with an expired session gets 403	PASS	2 ms	3
A-04	unknown session token gets 403	PASS	4 ms	4
A-05	session lookup failure fails closed with 403	PASS	2 ms	5
A-06	a student's oversized request is 403, not 413 (auth is checked first)	PASS	4 ms	6

B. POST /api/admin/uploads — request handling

ID	Test	Result	Time	Calls
B-01	Content-Length over 20 MB + 1 MB overhead is refused with 413 before the body is read	PASS	1 ms	7
B-02	Content-Length exactly at the limit passes the size gate	PASS	2 ms	8
B-03	a JSON body is refused with 400 invalid_form	PASS	1 ms	9
B-04	a non-numeric Content-Length header does not crash the route	PASS	1 ms	10

C. POST /api/admin/uploads — form fields

ID	Test	Result	Time	Calls
C-01	valid exam with every optional field returns 201 and the file link	PASS	6 ms	11
C-02	valid material with only required fields returns 201	PASS	4 ms	12
C-03	missing category is refused with 400	PASS	2 ms	13
C-04	lowercase category is refused with 400	PASS	2 ms	14
C-05	unknown category is refused with 400	PASS	1 ms	15
C-06	missing course is refused with 400	PASS	2 ms	16
C-07	missing title is refused with 400	PASS	1 ms	17
C-08	whitespace-only title is refused with 400	PASS	1 ms	18
C-09	title of 151 characters is refused with 400	PASS	1 ms	19
C-10	year 1949 is refused with 400	PASS	1 ms	20
C-11	two-digit year is refused with 400	PASS	9 ms	21
C-12	year two years ahead is refused with 400	PASS	3 ms	22
C-13	decimal year is refused with 400	PASS	2 ms	23
C-14	topic of 101 characters is refused with 400	PASS	3 ms	24
C-15	lowercase exam type is refused with 400	PASS	2 ms	25
C-16	exam type on a material is refused with 400	PASS	2 ms	26
C-17	unknown term is refused with 400	PASS	2 ms	27
C-18	professor from another course is refused with 400	PASS	1 ms	28
C-19	professor that does not exist is refused with 400	PASS	2 ms	29
C-20	unknown course is refused with 404	PASS	2 ms	30
C-21	title of exactly 150 characters is accepted	PASS	4 ms	31
C-22	year 1950 is accepted	PASS	3 ms	32
C-23	next year is accepted	PASS	3 ms	33
C-24	topic of exactly 100 characters is accepted	PASS	3 ms	34
C-25	padded fields are trimmed is accepted	PASS	5 ms	35

ID	Test	Result	Time	Calls
C-26	file sent as a text field is refused with 400	PASS	2 ms	36
C-27	missing file is refused with 400	PASS	1 ms	37
C-28	rejection logs never contain the title, file name or a long course ID	PASS	2 ms	38

D. POST /api/admin/uploads — file checks

ID	Test	Result	Time	Calls
D-01	.exe is refused	PASS	1 ms	39
D-02	no extension is refused	PASS	1 ms	40
D-03	double extension .pdf.exe is refused	PASS	1 ms	41
D-04	.html is refused	PASS	2 ms	42
D-05	empty .pdf is refused	PASS	2 ms	43
D-06	HTML renamed to .pdf is refused	PASS	2 ms	44
D-07	PDF renamed to .docx is refused	PASS	2 ms	45
D-08	JPEG renamed to .png is refused	PASS	2 ms	46
D-09	truncated PDF header is refused	PASS	1 ms	47
D-10	a 20 MB + 1 byte file without a Content-Length header is still refused with 413	PASS	80 ms	48
D-11	a file of exactly 20 MB is accepted	PASS	121 ms	49
D-12	the browser's MIME type is ignored; the stored type comes from the checked extension	PASS	5 ms	50
D-13	an uppercase extension is accepted and stored with a lowercase key	PASS	6 ms	51
D-14	Unix path traversal in the file name cannot escape the storage folder	PASS	10 ms	52
D-15	Windows path traversal in the file name cannot escape the storage folder	PASS	8 ms	53
D-16	OBSERVATION: any ZIP renamed to .docx/.pptx is accepted (only the 4-byte ZIP signature is checked)	PASS	6 ms	54

E. POST /api/admin/uploads — storage and record failures

ID	Test	Result	Time	Calls
E-01	a storage write failure returns 500, logs once with the error code, and creates no record	PASS	4 ms	55
E-02	a database record failure returns 500 and deletes the stored file	PASS	5 ms	56
E-03	when cleanup also fails, both failures are logged (the orphan file stays)	PASS	7 ms	57
E-04	an unexpected database error returns a generic 500 without leaking details	PASS	3 ms	58
E-05	two uploads with the same file name get different storage keys and both survive	PASS	7 ms	59, 60
E-06	the returned link URL-encodes the file ID	PASS	5 ms	61

F. Upload then GET /files/:fileId — file retrievable after upload

ID	Test	Result	Time	Calls
F-01	PDF exam opens byte-for-byte with the right headers	PASS	8 ms	62, 63
F-02	DOCX material opens byte-for-byte with the right headers	PASS	7 ms	64, 65
F-03	PPTX material opens byte-for-byte with the right headers	PASS	8 ms	66, 67
F-04	PNG exam opens byte-for-byte with the right headers	PASS	7 ms	68, 69
F-05	JPG exam opens byte-for-byte with the right headers	PASS	7 ms	70, 71
F-06	a refused upload leaves no file to open	PASS	3 ms	72, 73
F-07	a file deleted from storage after upload shows the 404 page, not an error	PASS	9 ms	74, 75

G. getUploadOptions — course list for the upload form

ID	Test	Result	Time	Calls
G-01	returns courses ordered by code with their professors flattened	PASS	15 ms	—
G-02	a database failure is logged and rethrown for the error page	PASS	3 ms	—

H. validateUploadFile and parseUploadForm — direct calls

ID	Test	Result	Time	Calls
H-01	an empty .exe is reported as unsupported (type is checked before size)	PASS	1 ms	—
H-02	a 2-byte JPEG is reported as corrupt, not crashed on	PASS	1 ms	—
H-03	parseUploadForm uses the given clock for the year limit	PASS	2 ms	—
H-04	parseUploadForm drops blank optional fields	PASS	2 ms	—

Results per API call

Every call the tests made, with the response the real code returned. Section F calls open the file that the call before them uploaded. Log events are the `logError` events emitted during the test up to and including that call. A call's **Result** is its test's result. The status is coloured green for 2xx, amber for 4xx and red for 5xx; amber and red are expected outcomes here.
